

I would like to petition the FCC to protect my right to hear the Christian radio station K-LOVE because it provides a safe positive influence for my 9 year old daughter and encouragement in my faith. This station gives hope and words of strength to the whole community. With so much negative information being broadcast it is crucial to have influences that give positive moral guidance to youth, troubled families and to the society in general. If you displace this station with an LPFM station then I believe it will create a great void in my city. It seems unfair and unethical for you to displace a radio station servicing a community without the approval of that community. Isn't this a democracy? On behalf of my daughter, my wife, my friends and my community I ask you not to displace my favorite radio station.
